Canadian Data Report of Fisheries and Aquatic Sciences No. 541

86-1142/

Canadian Data Report of Fisheries and Aquatic Sciences

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1–25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26–160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

Rapport statistique canadien des sciences halieutiques et aquatiques

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

ABSTRACT

Healey, M. C., B. Riddell, F. P. Jordan, and J. Morris. 1985. The 1981 - 1983 west coast troll log book project: 2. Data on catch of pink (Oncorhynchus gorbuscha) and sockeye (O. nerka) salmon. Can. Data Rep. Fish. Aquat. Sci. 541: 135 p.

During 1981 to 1983 fishing seasons, between 20 and 35 trollers recorded information on daily catch composition and biological parameters of catch in all outside fishing areas of British Columbia for the Fisheries Research Branch. The first report in this series describing what is called the 1981 to 1933 West Coast Troll Log Book Project provided a full description of the design of the project and also catch data on chinook and coho salmon that was obtained from this study (Healey, et al. 1985). This report presents the catch data on pink and sockeye salmon. In subsequent publications the catch data on chum and steelhead will be presented.

RESUME

Healey, M. C., B. Riddell, F. P. Jordan, and J. Morris. 1985. The 1981 - 1983 west coast troll log book project: 2. Data on catch of pink (Oncorhynchus gorbuscha) and sockeye (O. nerka) salmon. Can. Data Rep. Fish. Aquat. Sci. 541: 135 p.

Au cours des saisons de pêche des années 1981 à 1983, de 20 à 35 pêcheurs à la traîne ont consigné pour la Direction de la recherche sur les pêches de l'information sur la composition des prises journalières et sur les paramètres biologiques des prises dans toutes les zones de pêche situées au large de la Colombie-Britannique. Le premier rapport de cette série sur ce qu'on appelle le projet du registre de pêche à la traîne sur la côte ouest pour les années 1981 à 1983 décrit ledit projet en détail et fournit des données sur les prises de saumons quinnat et coho obtenues à partir de l'étude (Healy, et al. 1985). Le présent rapport contient des données sur les prises de saumons rouge et rose. On présentera les données sur les prises de saumon kéta et de truite arc-en-ciel dans des rapports ultérieurs.

INTRODUCTION

This report which presents the catch data by trollers for pink (Oncorhynchus gorbuscha) and sockeye (O. nerka) salmon is one in a series of reports describing the 1981-1983 West Coast Troll Log Book Project.

The project had two broad objectives (1) to describe the seasonal and regional variation in catch data and catch composition of trollers and (2) to relate the fleet distribution to capture success and oceanographic conditions.

A full description of the design of the project is provided in the report entitled "The 1981-1983 West Coast Troll Log Book Project: 1) Outline of the project and data on catch of chinook (Oncorhynchus tshawytscha) and coho (O. kisutch) salmon" (Healey, et al. 1985).

DESCRIPTION OF DATA COLLECTION

The following only briefly describes that portion of the project that is relevant to the collection of the catch data: During the 1981 to 1983 fishing seasons between 20 and 30 trollers collected information on daily catch composition in all outside fishing areas of British Columbia for the Fisheries Research Branch. We asked the fishermen to record on log books for three time periods of each day the number of hours spent fishing, the number of each salmon species landed, the number of each salmon species caught and released, the number of non-salmon species captured, and the location fished. The time periods for each day were before 1000 hrs, between 1000-1600 hrs, and after 1600 hrs.

Fifty-three vessels contributed to the catch data during the three years of the project. In 1981 there were 30 vessels providing information, in 1982 there were 20, and in 1983 there were 26. There were 19 vessels reporting in 1981 only, 5 in 1982 only, and 14 in 1983 only. Three vessels reported in both 1981 and 1982 and 4 vessels reported in both 1982 and 1983. Eight vessels reported in all three years. The sample of vessels for each year represented 1.5-2.5% of the coastal fleet of about 1200 trollers.

THE ARRANGEMENT OF FIGURES AND TABLES

Figure 1 shows the statistical areas within which catch was recorded for the purposes of this data summary.

Table 1 shows the catch data for pink and sockeye. The actual vessel numbers are coded to protect the anonymity of individual fishermen's data. The coding system used to number the vessels was maintained for the production of all reports associated with the West Coast Troll Project. Missing data are indicated in the table by periods, zeros are real observations. In a few instances there are apparent errors in the data set. For example, hours fishing during the time period 10 am to 4 pm may be recorded as greater than 6. This usually happened when time fishing during the preceeding or following time periods was lumped into the midday time period. In addition, when the fisherman merely indicated the total hours fished during the day, and did not break it down by time period, we have shown the total hours in the midday time period. In a few instances it appears that catch data are incorrectly recorded in the "kept" column and vice versa. We attempted to eliminate as many of these discrepancies as possible by carefuly checking of the data as it was collected. Those that could not be confirmed with the fishermen were left as originally recorded in the log books. In some instances, particularly with coho and pink, rate of capture was sufficiently high that the fishermen did not have time to record catch accurately during each of the daily time periods. Under these circumstances, the fishermen estimated the catch during each period, and these estimates were the values entered in the log books.

ACKNOWLEDGMENTS

Many people contributed to the success of this program. Chief among these were the fishermen who provided us with the data. Also involved in the project were Rus Schmidt, Bob Ball, Ted Carter, Louis Lapi, and various summer students.
